## Specifications

### GENERAL:

Aluminium single-hung windows as manufactured by Bahamas Aluminium Manufacturing Co. Ltd. to meet or exceed the American Architectural Manufacturers Association (AAMA) specifications.

### MATERIALS:

All frame and sash members shall be extruded 6063-T5 architectural aluminium alloy. Frame members to be 2" deep with a wall thickness of .062". Sash members to be 1" deep with a wall thickness of .062".

### CONSTRUCTION:

Window shall be coped at the corners and mechanically assembled with joints properly sealed.

### HARDWARE:

Sash operates on concealed block and tackle balances. Sash may be removed for cleaning purposes. Locking hardware shall be a cast aluminium latch located at the meeting rail.

### WEATHERSTRIPPING:

Double wool pile located inside and outside at vertical members of the operable sash. Single wool pile located at the meeting rail and elastometric vinyl located at the sill and bottom rail.

### FINISH:

Aluminium to be factory applied acrylic, baked-on white finish.

### GLAZING:

Factory glazed with double-strength (1/8" thick) glass retained by aluminium glazing bead.

### SCREENS:

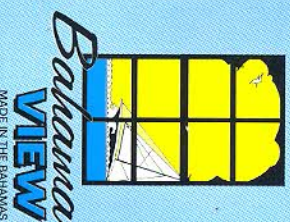

Rolled formed aluminium frames with 18x16 fibreglass mesh.

MADE IN THE BAHAMAS
